

CORESTA Biomarkers Sub-Group

A platform for scientific collaboration on tobacco-related biomarkers

Paul Nelson, Ph.D.

Biomarkers Sub-Group

FDA/CTP Workshop: Biomarkers of Potential Harm

Silver Spring, MD – April 4-5, 2016

CORESTA

**Centre de
COopération pour les REcherches Scientifiques
Relatives au TABac**

Cooperation Centre for Scientific Research Relative to Tobacco

The Vision

**To be recognised by our members
and relevant external bodies
as an authoritative source of publically available,
credible science and best practices
related to tobacco and its derived products.**

The Purpose of CORESTA

Encourage international cooperation

to actively work

on tobacco-related areas of research

2 x 2 Study Groups

- ❖ Agronomy & Leaf Integrity
- ❖ Phytopathology & Genetics

- Agronomy & Breeding
- Curing
- Sustainability
- Pests & plant diseases
- Agrochemical issues
- Good Agricultural Practices

Agro-Phyto
« AP »

- ❖ Smoke Science
- ❖ Product Technology

- Technical specifications
- Smoke analysis
- Analytical methods
- Consumer behaviour
- Biomarkers
- In Vitro Toxicity

Smoke-Techno
« SSPT »

Biomarkers Sub-Group

Biomarker Sub-Group

- ❖ Meets two times per year (typically in May and October)
- ❖ Convener: Dr. G.L. Prasad, Ph.D. (RAIS)
- ❖ Secretary: Dr. Kirk Newland, Ph.D. (Celerion)
- ❖ Participants: ~30 delegates from industry, bioanalytical labs, and other organizations

Biomarkers Subgroup Objectives

❖ Objective 1:

To review present knowledge of tobacco and smoking-related biomarkers of exposure and effect, and to document these in meeting minutes, CORESTA reports and scientific publications where appropriate.

❖ Examples include

- Selection, validation and quantification of biomarkers of effect
- Optimization of mass spectrometric methods for biomarker analysis
- Clinical study results
- Applications of systems biology approaches
- Physiological measures as biomarkers of COPD onset
- Published on urinary biomarkers of tobacco exposure and fit-for-purpose approach and smoking behaviou

Biomarkers Subgroup Objectives

❖ Objective 2:

To undertake ring trials / proficiency tests
for selected biomarkers

- Nicotine and metabolite ring trials
- Completed proficiency testing of 3-HPMA (publication planned)
- NNAL inter-lab method comparison
 - Welcome participation from non-members of the Sub-Group
 - Study planned for summer 2016

Biomarkers Subgroup Objectives

❖ Objective 3:

To source and develop reference materials to support biomarker analysis for those biomarkers selected for ring trials / proficiency tests

- Discussion on whether a guideline on standards for reference materials could be developed and presented to CORESTA

Biomarkers Sub-Group On-Going Work

- ❖ Technical Report - Proficiency Test
3-HPMA Interlaboratory Comparison Study
- ❖ Technical Report - Proficiency Test
Comparison BM / NNN-NNK
- ❖ Technical Report - Proficiency Test
Ranking of biomarkers in view of prioritisation
- ❖ Guideline for Reference Standards

Value of CORESTA

- ❖ Global interdisciplinary expertise from different sectors
- ❖ Focus on advancing scientific knowledge
- ❖ Leadership and coordination of inter-lab studies to recommend analytical methods

More Information

❖ For more information, please contact:
